- Green Windows, Reduce air conditioning costs
- Long Life, Negligible Maintenance
- Monsoon Proof
- Efficient Thermal Insulation
- UV Resistant
- Corrosion-Proof
- Energy Efficient
- Environment Friendly

Comparison Of uPVC Window With Aluminium & Wood

Particulars	uPVC	Aluminium	Wood
Surface Quality	The surface quality is maintained throughout its useful life	Anodizing wears out and oxidization sets in	Requires regular upkeeping
Thermal Insulation	Heat losses are reduced due to wider profile depth & multi chamber section	Poor being a metal it has a poor thermal insulation and high thermal conductivity	Fair
Fire Properties	Excellent	Excellent	Poor
Acoustic Insulation	Excellent, the multi chamber sealed cavities and welded corner offers excellent acoustic insulating properties	Poor, the mechanically joint corners render very poor result from Acoustic insulation angle	Fair
Dimensional Accuracies	Excellent, they are factory produced on sophisticated machine hence offer uniform quality control	Poor, they are fabricated locally, hence poor quality and non uniformity	Fair
Conservation of Energy	Excellent	Require 7.5 times the energy than that required to manufacture pvc	-
Preservation of Natural forest EWealth	Excellent	Excellent	Poor
Maintenance	NIL	NIL	Require regular painting & polish
Durability	Much stronger due to steel reinforced profile	Good	Good
Warping	Will not warp, last for a life time	Can warp	Can warp
